

TRACTOR SKIDDING NETWORKS ON THE MOUNTAINSIDES

I. OPREA¹ R. DERCZENI¹

Abstract: *The paper presents an analysis of the development variants of the tractor skidding networks in connection with the slope gradient, terrain morphology, exploited timber quantity per hectare. Also, the methodology to establish the optimum variant is described, also taking into consideration two equivalently skyline solutions.*

Key words: *logging, environment, skidding tractors, skylines.*
