

# GRAPHIC INTERFACES FOR DEMONSTRATING THE FUNCTIONING OF THE DATA ACQUISITION CARDS

Viorel POPA<sup>1</sup>

**Abstract:** *The present study aims to present didactic graphic interfaces, perfectly functional with corresponding electronic interfaces, both the former and the latter being achieved by the author. The interfaces have been conceived to show the students the main parts of a data acquisition card and to demonstrate the way in which these parts function.*

**Key words:** *Computer, graphic interfaces, parallel port, data acquisition.*
