

ASPECTS CONCERNING THE WORKABILITY OF *ALDER* AND *BIRCH*

E-A. SALCĂ¹ A. FOTIN¹ M. CISMARU¹

Abstract: *Some recent research studies were focused upon the workability of alder and birch showing the increased interest of the specialists from the wood processing department on the processing optimization of these wood species, more or less used until now, also called secondary resources. The paper presents a review literature of the research studies, results and conclusions referring to the workability of alder and birch.*

Key words: *alder, birch, processing, workability.*
