

GENERAL VIEW ON THE ECONOMIC-FINANCIAL DELINQUENCY

Diana MERTICARU* Roxana MATEFI**

Abstract: *The delinquency, which could be defined as the ensemble of human behaviours which are forbidden by criminal law, that is the total actions characterized as criminal offences according to the law, represents a great threat against democracy and public safety in Romania. The fundamental rights and freedoms are in danger any time a citizen becomes a delinquency victim. Delinquency generates fear among the population, reduces its trust regarding the authorities and their ability to involve actively into the state economic development.*

Key words: *delinquency, the economic-financial delinquency, underground economy.*
