C. IONAȘ<sup>1</sup> D. IONAȘ<sup>2</sup>

**Abstract:** *The main aspects treated in the present article are meant to show the consequences brought by the use of drugs. We think that the growing problem of drugs should be analyzed throughout the following three levels: consumption, trafficking and cultivation. All these aspects modify the social relations existing in our society in the worst manner possible. Teenagers in high schools, people of all ages come across the temptation of using drugs. As we can all see, the consumption of drugs is a growing problem in those social layers that are more developed from the financial point of view, due to the high prices of cannabis, ecstasy, opium, cocaine, etc.*

**Key words:** *drugs, trafficking, international routes.*
