

PATIENT'S RIGHT TO A SECOND OPINION IN THE SAME MEDICAL CASE

E. R. MANU¹ A. T. MOLDOVAN²

Abstract: *In the biological itinerary between conception and death, science raises multiple problems that need to be solved by the absolute respect of the human being, by a permanent balance between the scientific conquests and their significance.*

Doctor's activity has to monitor the following aspects: the respect of humans as a whole (nowadays fragmented in gametes, embryos, organs for transplant etc) and avoiding all abuses against human's liberty of expression

Key words: *medical law, second opinion, diagnosis, human rights.*
