

VEGETATION INDICES AND THE RELATIONS BETWEEN THEM

I. VOROVENCII¹ D.R. PELZ²

Abstract: *The paper presents the vegetation index used especially in the analysis of the vegetation according to satellite images. It also presents the ways of obtaining, the relations between them, the range of values, parameters which characterize the index based on the soil line, as well as certain limits of it.*

Key words: *vegetation indices, satellite images, soil line, band.*
