Abstract: Food quality is very well monitored by local and national Directions for Food Safety. The results of their analyze concerning the content of heavy metals (lead, cadmium) and the level of organophosphorus and organochlorine pesticides, during 2006 and 2007 were presented in this article. In all those cases the obtained values range are in the maximum allowed limits of the present legislation.

Key words: heavy metals, pesticides, toxicology, chromatography, food.
