

NADH₂-CYTOCHROME-C-REDUCTASE ACTIVITY IN RATS MYOMETRUM

Assistant *Antonela Chesca*, MD, PhD
Faculty of Medicine, “Transilvania” University Brasov

The NADH₂-cytochrome-c-reductase activity has been studied in rats' myometrium, during three distinct functional stages: non-pregnancy, pregnancy and post-pregnancy. The enzymatic activity particularities for each physiological stage have been observed.
