

PROBLEM-BASED LEARNING: A CUTTING-EDGE TEACHING TECHNIQUE

Ioana-Paula ARMĂȘAR¹

Abstract: *The paper briefly presents a modern methodology that has been developed in the field of technical and medical higher education and which is thoroughly compatible with language learning. It is based on interaction, team work, as well as individual study focused on objectives and the analysis within a given context of particular situations which call for critical thinking and reasoning on the part of the student.*

Key words: *education, problem-based learning, modern methodology, educational strategies, to teach how to learn.*
